2026 South Atlantic Jubilee Product Showcase Schedule

NEW FOR 2026

The Product Showcase offers you a chance to speak directly with the experts about their products and in some cases, participate in a hands-on demonstration. Sessions can be structured as an educational-style format, or a product demonstration or an interactive, hands-on experience for attendees.

No continuing education credit will be offered by the Jubilee for attendance at the Product Showcase Sessions. The focus is on product knowledge and application. However, the host manufacturing or supplier company may provide attendance/credit certificates from their company. It will be the contractor's responsibility to see if their state will honor any credits.

Product Showcase Sessions will run concurrently with the Professional Development Sessions.

SATURDAY, JULY 25, 2026

TIME 90 MIN.	PRODUCT SHOWCASE RM. 102-103	SESSION DESCRIPTION
8:00 am - 9:30 am	**Diversify Services with the Geoprobe® DM450** *Held outside in parking lot C* **Geoprobe Systems®**	Discover how the DM450 expands drilling capabilities. Built for speed and ease of use across multiple applications, it delivers powerful pullback, smooth head feed operation, and rotary head side shift. Engineered to reduce downtime, its rugged design features durable mechanical controls and productivity-boosting options like dual winches and rod handling options. With flexible configurations, the DM450 helps you complete jobs faster and confidently take on new project types.
10:00 am - 11:30 am	**VersaBoost™ Pro: Next Level Pressure Boosting** *Franklin Electric*	Join us for a hands-on training seminar exploring the VersaBoost™ Pro —an all-in-one constant pressure boosting solution designed to deliver reliable water pressure as demand fluctuates. Built with the trusted quality of Franklin Electric, VersaBoost Pro combines performance, reliability, and smart, space-saving design in a compact package. This session will cover system features, patented design advantages, and real-world applications, along with installation best practices using standard plumbing connections. Attendees will also learn how VersaBoost Pro scales easily—from everyday residential needs to demanding multi-pump applications—making it a flexible solution across a wide range of jobs.
12:30 pm - 2:00 pm	**Aquacase – A next -generation, all-in-one, Wi-Fi enabled, dual voltage booster system from Goulds Water Technology** *Xylem Goulds Water Technology*	AquaCase is our next-generation, all-in-one water pressure booster. Designed for residential and light commercial applications, with built-in Bluetooth and Wi-Fi connectivity keeping you informed with real-time alerts right to your smartphone. Its optimally positioned MNPT inlet and discharge ensure quick, hassle-free installation, while superior hydraulics provide quieter operation. Its NEMA 3R outdoor rating makes Aqua-Case suitable for both indoor and outdoor environments. Compatible with 115V and 230V applications, it offers flexibility for any installation.
2:30 pm - 4:00 pm	**Ductile Iron Check Valves** *Wells Water Systems*	We are proud to introduce our ductile iron check valves featuring advanced E-coat technology, stainless steel components, and full VFD compliance. Our E-coat process delivers 100% coverage of both exterior and interior surfaces. Combined with stainless steel poppet, spring, washer, and nut components, these valves are built to perform in the most demanding corrosive environments. Built tough. Protected inside and out.

SUNDAY, JULY 26, 2026

TIME 90 MIN.	PRODUCT SHOWCASE RM. 102-103	SESSION DESCRIPTION
9:30 am - 11:00 am	**Grundfos CUE100, SQE and 302 Controller** *Grundfos*	**Grundfos CUE100** The Grundfos CUE 100 is a compact, high-efficiency variable frequency drive (VFD), designed to precisely control pumps for residential, commercial and irrigation applications. We will be covering all capabilities and built-in technologies, protections, and remote troubleshooting function. **Grundfos SQE and 302 Controller** Grundfos SQE pumps and a CU302 control unit, you get a complete, intelligent solution for boosting water pressure. This setup offers smooth, reliable operation, constant pressure control, and energy efficiency—ideal for both residential and light commercial applications. Ease of install, and advanced features and functions make this the most intelligent residential pump on the market.
12:30 pm - 2:00 pm	**Turn Water Testing Into Profit** *Industrial Test Systems*	Learn how to turn water testing into a competitive advantage for your well drilling and water treatment business. This session demonstrates how the eXact iDip® Photometer delivers fast, accurate, on-site results for pH, iron, total hardness, nitrates, and up to 40 water quality parameters. Build a stronger understanding of water chemistry while seeing how real-time data improves system design, validates treatment performance, and builds customer trust. Gain practical strategies to increase efficiency, reduce callbacks, and grow your business.
